Writing

ANSWER SHEET

Ideas for future

The festival that took place in our town yesterday was really interesting to visit. I met many talented young people and learned about their amazing startups.

The most surprising one belonged to a group of volunteers. Their main idea was that future will be safe and comfortable only if people begin to take care of our planet and worry about it. They suggested others to clean streets from rubbish together and told everyone about the damage for animals because of pollution.

I have never seen so young boys who already realize the significance of ecological problems and seriously try to resolve them. That makes it unique.

Their project will help everybody to understand our influence on Earth and stop polluting environment and cutting trees. Volunteers also suggested many ways how the situation can be changed.

But there will be some difficulties in realization as some of the people just don't care about the well-being of the planet and they don't want to do anything for it.

I remembered words of two other visitors whom I met there. This startup about ecology is really interesting. But another one didn't support him, "That one about AI will be more important for future".

In my opinion, such festivals are the perfect places where young people can express their ideas about quite serious things. So, I hope I'll be able to visit it again next year.
