### ANSWER SHEET

#### The "Better Future World" Festival

Many young people have gathered here today to both present and view a variety of futuristic startups. From new biodegradable and eco-friendly ~~new~~ materials and technology, to plans for starting up a lab for cruelty-free meat, this Festival has it all!

The most surprising futuristic startup has to be the theoretical model of the Arc reactor coming to life. The young man presenting this idea said that he was inspired by the ~~technology~~ fictional superhero Tony Stark AKA Iron Man. ~~"The idea of clean, sustainable energy was too good to ignore, so I committed to the research and development of the real thing."~~ log.

This young man's vision could be what will save us from the increase of the earth's temperature. The <sup>100</sup>clean energy will start replacing the burning of fossil fuels for energy, decreasing air pollution and lessening the Greenhouse affect. ~~This could save our planet!~~

Unfortunately, there are quite a few challenges to get through before we can realise this dream. ~~There is quite a limit~~ Limited funds and materials pose a big issue to the startup. For this young developer, as is the time and energy he spends on the project. sp

"Seeing all these young people interested in a better world and a better future <sup>makes me very hopeful.</sup> ~~is very brings me great pleasure.~~ The future is looking more hopeful with every startup I see at this festival." Said an older gentleman visiting the festival.

"It is very ~~ispp~~ inspiring! It gives me so many ~~ideas~~ ideas of what I want to do when I am older!" exclaimed a young schoolgirl passionately.

Personally, I feel that festivals such as these are very important in preventing stagnation in society. Young people especially need the motivation to build and improve, ~~to grow and develop.~~ The "better future world" festival is perfect for this.
